

SUMMARY

Technical lead/manager with 27+ years in IT delivering enterprise-scale, cloud-native applications, leading enterprise-scale engineering programs and cloud transformations. Deep technical expertise in AI/ML, distributed systems architecture, and solution engineering with hands-on experience deploying production GenAI applications on AWS. Proven track record managing cross-functional teams across multiple geographies, driving technical roadmaps, and delivering \$10M+ programs from conception to production. Hold AWS Professional certifications (DevOps Engineer, Solutions Architect) plus AWS Machine Learning Engineer and AI Practitioner credentials with demonstrated hands-on AI/ML implementation experience.

EDUCATION

Master of Science in Computer Science	Stevens Institute of Technology, NEW JERSEY
Bachelor of Technology in Electronics & Telecommunications	National Institute of Technology, INDIA

PROFESSIONAL CERTIFICATIONS

Featured AI/Cloud Certifications:

AWS - Machine Learning Engineer, AI Cloud Practitioner, Solutions Architect Associate, Developer Associate, Database Specialty

Project & Delivery Management:

Project Management Professional (PMP), Scrum Master (PSM1), ITIL v3 (F)

Security & Operations:

Certified Information Systems Security Officer (CISSO)

Core Technical Skills

- **AI & Machine Learning** – OpenCV, NumPy, Pandas, Scikit-learn, Hugging Face Transformers
- **NLP & Voice AI** – LLM APIs (OpenAI, Anthropic, Gemini), Google Cloud TTS/STT, Amazon Lex
- **Cloud AI Services** – AWS SageMaker, AWS Bedrock, Google AI Studio
- **Deployment & Data** – AWS Lambda, API Gateway, ECS/Fargate, DynamoDB, vector databases for RAG
- **AI/ML Integration**: LLM APIs (OpenAI, Anthropic, AWS Bedrock), RAG pipelines, NLP, Hugging Face Transformers, GCP AI APIs
- **Full Stack Development** – Python, JavaScript, NodeJS, Angular, React, REST APIs, SQL/NoSQL
- **DevOps & Architecture** – Microservices, CI/CD (GitHub Actions, Jenkins), Docker, IaC, Serverless

WORK EXPERIENCE

CAPITALONE (MADISON, WI/PLANO, TX - REMOTE/HYBRID) 03/2026 – TILL DATE **TECHNICAL PROGRAM MANAGER (VIA ENCORE CONSULTING)**

- Led enterprise DevOps transformation across key product groups; drove technical architecture discussions and system design decisions for microservices migration
- Lead OnePipeline enhancements like escalation logic and routing for automatic deployment, onboarding of OTEL across components
- Oversee application enhancements requirements for migration from GitHub Enterprise to Github Cloud
- Leading applications monitoring and efficiency increase initiatives across key DevOps pipeline group (One Pipeline)

Technologies: AWS (Lambda, ECS/Fargate, S3), CloudFormation/Terraform, Docker, Jira, Jenkins, API Gateway, Confluence, Splunk, New Relic, Claude Code, Amazon Q

ENCORE CONSULTING (MADISON, WI) | TECHNICAL MANAGER 08/2025 – 02/2026

- Providing technical roadmaps, proof-of-concepts, and architecture reviews for client proposals/RFPs (public/private)
- Developing business development strategies and solution architecture for enterprise cloud programs
- Leading pre-sales technical consultations for cloud migration opportunities valued at \$2M+

Technologies: AWS, Docker, CloudFormation/Terraform, Azure DevOps, Jira, API Gateway, AI-Assisted Development Tools

- **CAPITALONE (MADISON, WI/PLANO, TX - REMOTE/HYBRID) 08/2024 – 07/2025**
TECHNICAL MANAGER (VIA ENCORE CONSULTING)
 - Developed and maintained scalable, high-quality code in C#, .NET Core, Python, NodeJS, Angular, and React as part of microservices and serverless architectures.
 - Led implementation of **Blue-Green and Canary deployments** for production systems.
 - Applied **XP, Lean, and Agile** practices to deliver high-quality releases with reduced cycle times

Technologies: AWS, NodeJS, Python, Docker, Jira/JQL Query, Jenkins, Lambda, Amazon ECS/Fargate, API, Confluence, Splunk, New Relic, GitHub Copilot, Amazon Q

- **ENCORE CONSULTING (MADISON, WI) 07/2015 – PRESENT**
SENIOR ENGINEERING LEAD & TECHNICAL MANAGER
 - Delivered enterprise applications using Angular, React, .NET Core, AWS, and Azure.
 - Designed and led cloud migration strategies with microservices architecture.
 - Applied DevSecOps practices ensuring regulatory compliance.

Technologies: *Azure DevOps, AWS, Azure Cloud, DynamoDB, SQL Server, Angular, React, O365/Azure AD*

- **SC Johnson, Racine, WI 2014 –2015**
IT CONSULTANT
 - **Led engineering teams** in enterprise security application development and implementation across business units
 - **Managed delivery processes** for ForeScout NAC and Courion IAM projects using Agile methodologies
 - **Implemented data security governance** frameworks ensuring compliance with regulatory requirements

- **Infosys, US/India** **2010–2014**
SENIOR TECHNICAL PROGRAM MANAGER
 - **Led application modernization initiatives** delivering enterprise applications for Fortune 500 clients including Harley-Davidson, Toyota, Volkswagen, and Microsoft
 - **Architected scalable solutions** using .NET Framework, Java, and modern web technologies across hybrid cloud environments
 - Practiced Agile methodologies with focus on continuous integration, code quality, and customer collaboration

Technologies: *SharePoint, Agile, .NET Framework, SQL Server, Oracle, Data Warehouse*

- **Various Roles (Early Career – Tech Mahindra, Cognizant, HAVAS Worldwide)** **1998 – 2010**
 - Developed enterprise applications using modern programming languages and emerging web technologies, including online workflow applications and migration
 - Implemented data warehouse solutions with intelligent reporting and analytics capabilities
 - Collaborated with international teams delivering scalable applications with focus on user experience and performance optimization
 - Applied advanced software engineering including OOD/OOP, data structures, algorithm optimization, and early AI integration

Technologies: *.NET Framework, ASP, SQL Server, Oracle, Data Warehouse, Actuate, Crystal Reports*

- **SELECTED AI & EMERGING TECHNOLOGY PROJECTS (ENTERPRISE & PERSONAL)**
 - **Spatial Reasoning & Visualization App** - [View Demo](#)
 - Built prototype to interpret natural language spatial descriptions and render 3D scenes.
 - Utilized **OpenCV**, **NumPy**, **Pandas** for image processing and geometric reasoning.
 - Integrated symbolic reasoning with LLMs for contextual accuracy.
 - **VoiceBot Conversational Assistant** - [View Demo](#)
 - Developed multilingual voice assistant with context retention and dynamic API integration.
 - Used Google Cloud TTS/STT for speech synthesis and recognition.
 - Built serverless backend with AWS Lambda & DynamoDB.
 - **AI-powered Alexa Skill** - Voice-first intelligent assistant implementation - [Link here](#)
 - **AWS AI/ML Certification Audio Guide** - Spotify podcast series using AI (Notebook LM) for community-based learning for AWS AI certification - [Link here](#)
 - **Created Alexa Skills for various user base like:** Geo Skill, Visa Updates, etc.
